#About us

//
Partnering with
AceObjects saves
time, money and human
resources which can
otherwise be focused
on accelerating your
business and enhancing
services.
//

// AceObjects' mission is to serve the present and future needs of corporations, governments, and innovators providing carrier-grade enterprise software and software-related services to shape the future of society at large.

// Understanding your requirements, challenges and technology goals is our foundation for successful solutions delivery. Our standard setting achievements ensure our customer's success at all times.

// AceObjects provides a comprehensive product and solutions portfolio backed by the ultimate in security, performance and reliability via a fusion of technology and a team of dedicated professionals. We use the latest technologies to ensure flexibility, carrier-class reliability, best pricing and highest quality to maximise your performance giving you the leading edge.

#Services

// Whether you're implementing software on premise, need customised solution delivery, require expert consultancy, building mobile applications or accessing API software over the cloud, we offer a wide range of services designed to fit your needs. Our approach involves developing close and flexible working relationships with our clients and helping you to maximise your investment.

// AceObjects combines core competencies with years of expertise in business and information technology industries to help our clients improve their business processes and customer value. Over the years, we have provided IT services to many business enterprises and are experienced at handling a diverse range of IT requirements.

// We have resources and processes to research, design and implement robust, scalable and cost-effective bespoke business solutions.

//
Our multilingual team conducts research with our worldwide partners to deliver solutions and provide continuous support to make your business successful.
//

#Services

{ Mobile App Development

// We build apps for all key platforms and our specialism is in building engaging, effective and fluid mobile apps that are configured to meet your end-to-end business and consumer solutions.

// We develop apps for business to business and integrate apps with existing back office systems as businesses are increasingly becoming aware of the potential for Android and iPhone applications to assist business.

// Our developers are dedicated mobile enthusiasts and understand the mobile landscape natively and have developed a solid understanding of Android SDKs, iOS SDK, Tizen SDK for Wearable, and Samsung Mobile SDK.

{ Web Design and Development

// Web development is the most important part of creating a professional website after designing. Whether you're an existing organisation, or a start-up small business, we offer you a top-notch solution, providing you with an affordable web presence.

// We have fully qualified and experts developers available to handle challenging projects If you would like to outsource application development, database integration, a membership portal, social networking website, an intranet/extranet application, custom web CMS, E-Commerce website, or just about any graphics, web design and development project, then our team have the technical expertise and practical experience to create the right solution for you.

#Services

{ Systems Integration

// Our consulting and software engineers have vast experience in developing technically sound solutions by combining knowledge with advanced computing technologies. We can adapt our existing software packages to fit your unique requirements and to work with your existing legacy systems. Or, we can work with you to develop completely new business solutions that include:

- Web-based collaboration systems
- Mobile app-based collaboration systems
- Storing and retrieving project data
- Onsite installation and support
- Data hosting and IT support

{ Integrated Sales and Marketing

// The success of your website or mobile app business depends on maximizing the lifetime value of your users, and more importantly, turning those users into customers. And that's why you need integrated marketing in order to maximize web or in-app revenues.

// If your objective is to create awareness and increase online sales, we can help with that. We offer many different services, allowing your company to exploit the full digital range. Our core focus is to deliver the highest level of customer service and innovation to facilitate your digital marketing and communications goals.

// Our tailored approach will pull together a cohesive plan that highlights the benefits of your mobile app with the goal of making sure the individuals that are seeking what you offer find it before your competitors find them.

// Your campaign may require a variety of techniques as well as different media platforms. Whatever your needs, be it search engine optimisation or paid search advertising, we have the expertise to support all of your digital marketing requirements.

#Technical consultancy

{ Investing in the future of your business

// As your business evolves and grows, it faces new challenges and our experienced consultants are available to provide advice and configure tailored solutions in meeting those challenges. We work with organisations of all types and sizes to make your technology work the way you need it to work - the way that works best for you and your organisation.

// Contact us for help with:

- General computer consulting
- Creating an IT infrastructure that works for you today and that will grow with your business
- IT system and network design, installation, upkeep, maintenance and trouble-shooting services
- Software and hardware sales and installation
- Hands-on IT training
- Telephone technical help desk

//
...giving you an edge over
your competitors
//

{ Planning for the Future

// Create the IT infrastructure your organisation needs to support business demands today and attain long-term goals.

// AceObjects consultants include published technical authors, speakers and software engineers that offer expertise, assistance and resources to help you achieve IT agility.

// If you want a solution that is based squarely on your needs and budget rather one from the manufacturer that gives a supplier the best commission or benefits, then send us an email or give us a call! We back our work with a 100% no-quibble guarantee.

//
...a flexible
win-win working
relationship
//
